

Stauss Hospital

Galena, IL
Spring 2007
Exterior Insulation
Finish System (EIFS)
210,000 Board Feet

Application:

160,000 board feet of Wall Specification Grade (WSG) expanded polystyrene (EPS) was installed in an Exterior Insulation Finish System on the Stauss Hospital. An additional 50,000 square feet of custom architectural shapes completed the exterior of the building.

Builder & Contractor:

Tom Quinn
Builders Sales & Service

Supplier:

Joe Elceser
Gypsum Supply

Project Details:

Spring 2007, exterior insulation finish systems were installed on the Stauss Hospital in Galena, Illinois to provide the building with architectural detail and energy efficiency at a lower cost than traditional stucco. ACH Foam Technologies provided the EPS for the exterior insulation finish system.

In addition to Wall Specification Grade EPS, ACH Foam Technologies also provided custom architectural shapes that added additional architectural detail to the exterior of the building.
