

Village Pizza & Pub

Elgin, IL
Summer 2007
Structural Insulated Panels
13,260 Square Feet

Application:

13,260 square feet of Structural Insulated Panels were used to frame the roof of the new Village Pizza & Pub in Elgin, Illinois.

Project Details:

Architect:

David L. Jenkins
David L. Jenkins & Associates

In summer 2007, architect David L. Jenkins chose 8 1/4" Structural Insulated Panels for its energy efficiency and its aesthetic complement to the log roof trusses of the new Village Inn and Pizza.

Contractor:

Mike Sarillo
Heartbilt Homes

In addition to providing Structural Insulated Panels, ACH Foam supplied block splines, ridge filler, Do-All-Ply adhesive, screw fasteners and custom cutting for the project.
