

Project Profile

Custom Home Hawaii

R-Control Systems

Multiple R-Control building systems made with **PerformGuard®** EPS TERMITE RESISTANT were chosen to provide a strong, comfortable and termite-protected custom home.

Comfort

Beautiful Hawaii provides the backdrop for this custom home. R-Control products help control temperature for this home by using only one 30,000 btu split a.c. unit to cool 3,600 sq. ft. of living space. Keeping it cool under the hot Hawaii sun!

Strength

R-Control SIPs and R-Control ICFs provide the strength to resist the tropical storms and hurricanes that frequent the Pacific.

Quick Facts

3600 sq. ft.

R-Control ICF Foundation

R-Control SIP Walls

R-Control SIP Roof
