Foam-Control® Plus+™

ARCHITECTURAL GRADE EPS

Insulation

Premium Quality & Value

ACH Foam Technologies' Foam-Control® Plus+™ is an architectural grade expanded polystyrene (EPS) insulation product line with a high compressive strength and high R-Value. Foam-Control® Plus+™ is a premium grade insulation. It's designed to give architects, designers and contractors all of the benefits of a high quality insulation: strength + energy efficiency + moisture resistance, bundled together to equal a budget friendly product that will help keep project costs on track.

From frost-line to roof-line, Foam-Control® Plus+™ is used in a wide range of applications. Perimeter insulation, underslab insulation, cavity wall insulation, sheathing, pre-cast concrete applications, green roofs, plaza decks, and waterproofing applications especially benefit from its exceptional strength, energy efficiency, and moisture resistant properties.

Performance Commitment

Foam-Control® Plus+™ comes with a 20-year warranty for 100% of its R-Value. Regardless of thickness, density or application - the warranty is the same. 100% for 20-years. The stable, long-term R-Values of R-5, R-10, R-20, and R-30 help reduce energy costs and greenhouse gas emissions.

The closed cell structure of Foam-Control® Plus+™ provides superior moisture resistance + consistent long-term performance in freeze-thaw conditions = performance you can count on.

Flexible Options

Needs change and so do project requirements, sometimes a little too fast. Foam-Control® Plus+™ is available in a variety of sizes and strengths, allowing it to keep up with rapidly changing needs. The 15, 25, 40, and 60 psi strength ensures less jobsite breakage and helps to protect walls and foundations during backfill. Foam-Control® Plus+ is available with Perform Guard®, a safe and effective additive that resists termites. Single 4' x 8' sheets are available up to 36" thick.

Sustainability

Well insulated buildings not only perform better, they also reduce greenhouse gas emissions. The energy efficiency of Foam-Control® Plus+™ contributes credits to LEED certified projects. EPS contains no ozone depleting agents and is easily recyclable.

Strength + Energy Efficiency + Moisture Resistance

Applications

- Perimeter & Underslab Insulation
- Cavity Wall Insulation & Sheathing
- Pre-Cast Concrete Cores
- Green Roofs & Plaza Decks
- Waterproofing Applications

Benefits

+High Strength

- Foam-Control® Plus+™ 150 (15 PSI)
- Foam-Control® Plus+™ 250 (25 PSI)
- Foam-Control® Plus+™ 400 (40 PSI)
- Foam-Control® Plus+™ 600 (60 PSI)

+High R-Values

- R-5
- R-10
- R-20
- R-30

+Stable, Long-Term Performance

20 Year Warranty for 100% of its R-Value.

+Moisture Resistant

Retains R-Value when exposed to moisture.

+Termite Resistant

Perform Guard® treatment.

+Environmentally Friendly

Reduces Energy Costs & Greenhouse Gas Emissions. Helps earn LEED credits. Easily recyclable.

Quality

Thorough evaluations conducted by ICC-ES, combined with ACH Foam Technologies' strict manufacturing specifications and quality control, assures our customers receive a consistently superior product. ACH Foam Technologies provides quality UL labeled EPS products.
