A lightweight, easy to use material for quick installation.

Foam-Control® Geofoam is a cost-effective, durable, and time saving solution for stadium seating. Cost effective structural design is among the highest priorities in construction. Foam-Control Geofoam is available in a range of strengths necessary to provide structural integrity and cost effectiveness. Geofoam is proven to lower installation costs.

- Quicker Installation
- Precut blocks available to match custom project configurations
- Lightweight with high strength
- Excellent adhesion to concrete

## Compressive Resistance.

## FOAM FACE-OFF:

Choosing Foam-Control geofoam over light gauge metal framing and structural steel.

- Geofoam installs faster
- Geofoam can easily vary strength, thickness, and size
- Geofoam is less-expensive than light gauge metal framing and structural steel
- Geofoam is more easily fabricated into different shapes
- Geofoam allows for more design possibilities
- Geofoam provides a solid foundation and eliminates a void which is a detriment to acoustics

Sizes and Shapes.

Foam-Control Geofoam can be made in large or small, thick or thin sections. It can be custom cut in sizes ranging from a few square inches up to 3’ x 4’ x 16’. Shop drawings for custom projects are easily produced on computer aided cutting equipment.
Proven to meet, or exceed, building codes.

Foam-Control Geofoam is manufactured under an industry leading quality control program monitored by UL and further recognized in UL Evaluation Report UL ER11812-01. Foam-Control meets ASTM D6817, “Standard Specification for Rigid, Cellular Polystyrene Geofoam.”
